

Inspiring Professionalism

We guarantee you complete peace of mind

Dear customers,

First, we would like to thank you for your interest in Sun Safes Mfg. Co., Korea.

Sun Safes was founded in 1973 and has since then earned a reputation for supplying high-quality safes and delivering the very best customer service. As a leader in the Korean safe market, Sun Safes has, over the years, developed many technologies and accumulated a vast amount of know-how. We have also played a pivotal role in upgrading the level of Korean safe manufacturing skills to meet international standards.

We now boast more than 100 partners worldwide, and hope to expand this number even further in the near future.

With an eye toward achieving ultimate customer satisfaction and creating a safer more secure world for all, we will continue to put forth great efforts to develop outstanding products and technologies.

Yours Sincerely,
All the staffs and Sun Safes Mfg. Co.

- 2005.06. Korea world's best product award by the Minister of Commerce, Industry and Energy.
- 2006.11. Tower of 10 Million Dollar Export awarded

Company introduction ▶▶

From a safe repair man to founder of Sun Safes Mfg. Co.

Y.H. Kim, the founder of Sun Safes Mfg. Co., was a humble safe repair man when he made up his mind to start his own safe manufacturing company. Mr. Kim realized the sad state of the safe business in Korea, noting that Koreans often used imported safes owing to the low quality of Korean safes. He was determined to improve the quality of Korean safes and set off for the United States in order to learn advanced safe manufacturing technologies. After working as a laborer for 10 years in various safe manufacturing companies and as a locksmith, Mr. Kim returned to Korea armed with the knowledge needed to open his own company, which he did, in 1973, under the name Sun Safes Mfg. Co. and in collaboration with Ms. Y.S. Kim, who is the current president.

Transforming Korea from a safe importing country to a safe exporting country

Mr. Kim first built a test furnace in the factory, with which he continually conducted fire tests on safes. When his safe endured 3 hours and 30 minutes at 980°C, clearly showing its high-quality, many high-ranking government officials and reporters from major broadcasting companies and newspapers were on hand to cover the milestone event. Impressively, Mr. Kim's safes passed the UL class 350 one hour test and the impact test at the same time, a first in Asia. With this achievement as momentum, Mr. Kim went on to lead the Korean safe market, continually developing new kinds of safes to meet customers' diverse needs and eventually transforming Korea from a safe importing country to a safe exporting country.

Consistent innovation and renovation in safe manufacturing

Sun Safes has consistently invested in improving its production facilities. The company automated its business plants to quicken business processes, the benefits of which have been felt by customers worldwide. Safes introduced a CO2 laser cutting machine, roll forming machine etc. to enable mass production, and has maintained its efforts to raise productivity. These initiatives have made it possible for the company to offer the highest quality safe products at reasonable prices to more partners around the world.

Put the customer first, make premium quality safes, and achieve a win-win business

Armed with confidence garnered from our past successes and accumulated know-how, Sun Safes' members continually introduce higher standards of quality into the market with new-concept safes that offer ease-of-use and convenience in everyday life.

With our "win-win partnership" philosophy enabling us to see from the customer's point of view, we have built a solid foundation from which to create products that will continue to satisfy the needs of our customers well into the future. Indeed, Sun Safes is an open-minded company that not only welcomes the suggestions of our business partners and customers, but uses these ideas to make our company even stronger.

At Sun Safes, we believe that efforts such as these will contribute to the realization of a "Comfortable and Secure Life" for all-the ultimate goal of the company.

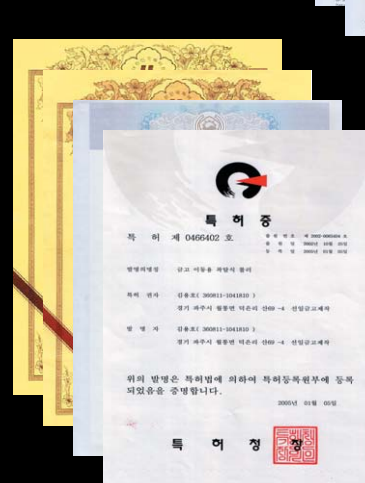

Certificates

The superiority of Sun Safes' products has been demonstrated not only by customers but also by world famous authorities in the security industry.

A safe is not just a steel box, but a skill and a science.

-  **UL** (Underwriters Laboratories Inc.) - UL 72, Fourteenth Edition (Class 350 - 1 hr)
 -  **UL** (Underwriters Laboratories Inc.) - UL 1037, Antitheft Alarm and Devices

Fire & Drop test

Fire resistant testing in accordance with KS G 4500, UL-72, NT Fire 017 - 60P / 90P / 120P

1. TEST READY

Sun Safes Model SS-080 awaiting the fire resistant test.

2. HEATING TEST

The temperature in the airtight furnace gradually rises to 1,010 Centi Degree (1,860F) within two hours.

3. DROP & RE-HEATING TEST

After the 9.1 m dropping test, the safe is once again heated in the furnace.

4. TEST RESULT

Proven security! All items in the safe were perfectly protected from fire, proving the premium quality of the product.

Actual Fire accident

In 2004, a fire burned down a large retail store in Korea.

The fire burned for over 3 hours and completely destroyed the building.

Amidst the rubble and ashes, there was an Eagle Safe in working condition.

The safe protected all items including: a bank deposit book, insurance documents, and cash.

SAFETY & ANTI THEFT FIRE RESISTANT SAFE W/COMBINATION SF680-4DKK

Offers smooth and quiet suspension filing system to protect your important documents from fire and robbery.

► Features and dimension

- To accommodate foolscap, letter and legal size on width adjustable hanger files.
- Selective Locking System : Permits locking of any 1 to 4 drawers independently or collectively (Master Drawer Cam on top drawer can control the lower drawers.)
- We ensure that each Drawer is capable of carrying a close 100 Kgs of filing, way beyond the standard requirement.
- Steel Thickness : Out → 1.2 mm / In → 0.7 mm -
Insulation between the walls : Cement + Water + Fine Powder

Model	Outside (mm)			Inside (mm)			Weight (kgs)
